## ABSTRACT

This document describes the essential competencies from secondary through post-secondary associate degree programs for a career in business management. Ohio College Tech Prep Program standards are described, and a key to profile codes is provided. Sample occupations in this career area, such as management trainee, product manager, and advertising executive, are listed. A table lists year 2003 business core competencies and business management competencies by instructional unit and educational level. Next are core business competencies and business management competencies, all of which appear by instructional unit. Each competency is accompanied by key indicators. The core instructional units are: career development for business, professional effectiveness, business economics, business communications, accounting, computation, business law, technology, international business, management, marketing, entrepreneurship. The business management units are: professional development and networking, professional effectiveness, general administrative functions, management, entrepreneurship, operations management, human resources management, quality assurance, process/project management, financial management, business law and legal issues, risk management, international business, intelligence management, data mining, and knowledge management. Four appendices contain a list of review panel members; a blank template that can be used to prepare a college preparation pathway, with spaces to list classes and prerequisites; professional associations, certifications and licensure in the field; and a map showing the Ohio Tech Prep Consortia. # Introduction

Technical Competency Profiles (TCP) are collaboratively developed by the Ohio Board of Regents and the Ohio Department of Education, Career-Technical and Adult Education, and the Center on Education and Training for Employment at The Ohio State University. The profile provides a framework for a broad-based secondary and post-secondary curriculum.

The profile includes essential competencies for programs from secondary through post-secondary associate degree programs. Each area contains competencies common to each of the occupations within a career cluster and competencies specific to an occupation. This profile design reflects programming flexibility that represents many options for educational studies and career planning.

Representatives from a broad spectrum of Ohio professionals played a critical role in defining the vision and scope of the TCP and in defining the essential and recommended skills for current and future employees. Secondary and post-secondary educators representing Ohio schools and colleges leveled the competencies to create career pathways from secondary to associate degree programs. A list of business and industry representatives and educators participating in the development of the profile appears in Appendix A.

Technical Competency Profiles (TCP) are used as the basis for the development of an integrated delivery system that provides opportunities for new and challenging programs and courses. Career-Technical Education, College Tech Prep, and post-secondary degree programs will be enhanced and expanded through the use of the Technical Competency Profile (TCP).

The profiles are available on the Internet at [www.ohtpcs.org](http://www.ohtpcs.org). At this location users can download copies of the entire profile or conduct searches on a number of key variables.

# College Tech Prep Program Standards

College Tech Prep programs are rigorous programs of study starting at the secondary school level and continuing through the associate degree and beyond. In accordance with the Carl D. Perkins Vocational Technical Education Enhancement Act of 1998, College Tech Prep programs are seamless, non-duplicative programs of study combining high-level academic and technical preparation in a variety of career fields.

The Carl D. Perkins Vocational and Technical Education Act of 1998 defines College Tech Prep as:

*A program that provides technical preparation in a career field such as engineering, applied science, a mechanical, industrial or practical arts or trade, agriculture, health occupations, business or applied economics and must do the following:*

- *Combines at least two years of secondary and two years of post-secondary education in a sequential course of study without duplication of coursework*
- *Integrates academic, vocational and technical education, and if appropriate and available, work-based learning*
- *Provides technical preparation for careers*
- *Leads to an associate or a baccalaureate degree or post-secondary certificate in a specific career field*
- *Leads to placement in appropriate employment or further education.*

**The Ohio College Tech Prep Advisory Council recommended to the Ohio Board of Regents and the Ohio Department of Education the following standards for all College Tech Prep programs:**

1. Academics are taught at a college-preparatory level and are aligned with state models and academic content standards.
2. In addition to Ohio graduation requirements specified in SB 55, required academic components for College Tech Prep programs include:
  - a. Mathematics taught at a minimum level of Algebra II by the completion of high school.
  - b. An integrated or stand alone senior-year math component
  - c. Three units of science including at least two lab-based science courses
3. College Tech Prep programs will use a state-developed Technical Competency Profile (TCP) as the basis for pathway development. The pathway document should reflect secondary and post-secondary course work and should be made available for stakeholders. All secondary and post-secondary TCP competencies must be clearly identified and addressed. The TCP is the framework used to develop all associated curricular documents; however, components from other competency profiles such as OCAP's (*Occupational Competency Analysis Profile*), ITAC's (*Integrated Technical and Academic Competencies*) and SCANS (*The Secretary's Commission on Achieving Necessary Skills—America 2000*) may be included and are not mutually excluded from a TCP.
4. Articulated pathways will be reviewed every two-years at the consortia level.
5. Pathways operate under an articulation agreement between/among partners in a consortium.
6. College Tech Prep programs at the secondary level will operate as state-approved, career-technical education programs.
7. Academic and technical instruction is integrated and delivered in a contextual approach where possible.
8. Programs have common representation from secondary education, higher education, business, and labor members.
9. Post-secondary programs contain advanced skills in the TCP document.
10. Programs must operate under either regionally accredited post-secondary institutions/degrees or approved apprenticeship programs meeting U.S. Department of Labor standards.
11. College Tech Prep programs, secondary and post-secondary, must comply with the state College Tech Prep Advisory Council's performance measures.

State College Tech Prep Advisory Council  
Revised and Approved: May 1, 2002

# College Tech Prep

College Tech Prep is a high school and college career path linked to business, industry, and labor that insures a specified seamless pathway from high school to college to careers, meeting Ohio's technological employment needs.

A College Tech Prep student is enrolled in a state-approved College Tech Prep education program. A College Tech Prep Program means a program of study that:

- Combines, at a minimum, two years of secondary education (as determined by Ohio definitions) with a minimum of two years of post-secondary education in a non-duplicative, sequential course of study.
- Integrates academic and technical instruction and utilizes work-based and work-site learning, where appropriate and available.
- Provides technical preparation in a career field such as engineering technology; applied science; mechanical; industrial or practical arts or trades; agriculture; health occupations; business; or applied economics.
- Builds student competencies in mathematics, science, reading, writing, communications, economics, and workplace skills through applied, contextual academics, and integrated instruction, in a coherent sequence of courses.
- Leads to an associate or baccalaureate degree, or a BAT (Bureau of Apprenticeship Training) apprenticeship requiring a minimum of two years in a specific career field.
- Leads to placement in related employment, or to further education.

# Key to Profile Codes

## Importance of Competencies

All of the competencies in this document represent the minimum requirements for a College Tech Prep program. It is the responsibility of the local consortia to further define and/or expand, as needed, the key indicators for each competency. Each competency must be taught at the Proficient level (P) by the completion of the College Tech Prep program, which is an Associate Degree (AD). A minimal number of competencies have been identified as Introduce (I) at the Associate Degree level. These may require further higher education.

**This document integrates college prep level academics with technical skill. Technical skills are a required component.**

**I = Introduce** (Learner will demonstrate knowledge and comprehension of the competency.)

**P = Proficient** (Learner will demonstrate ability to apply knowledge of and/or perform the competency.)

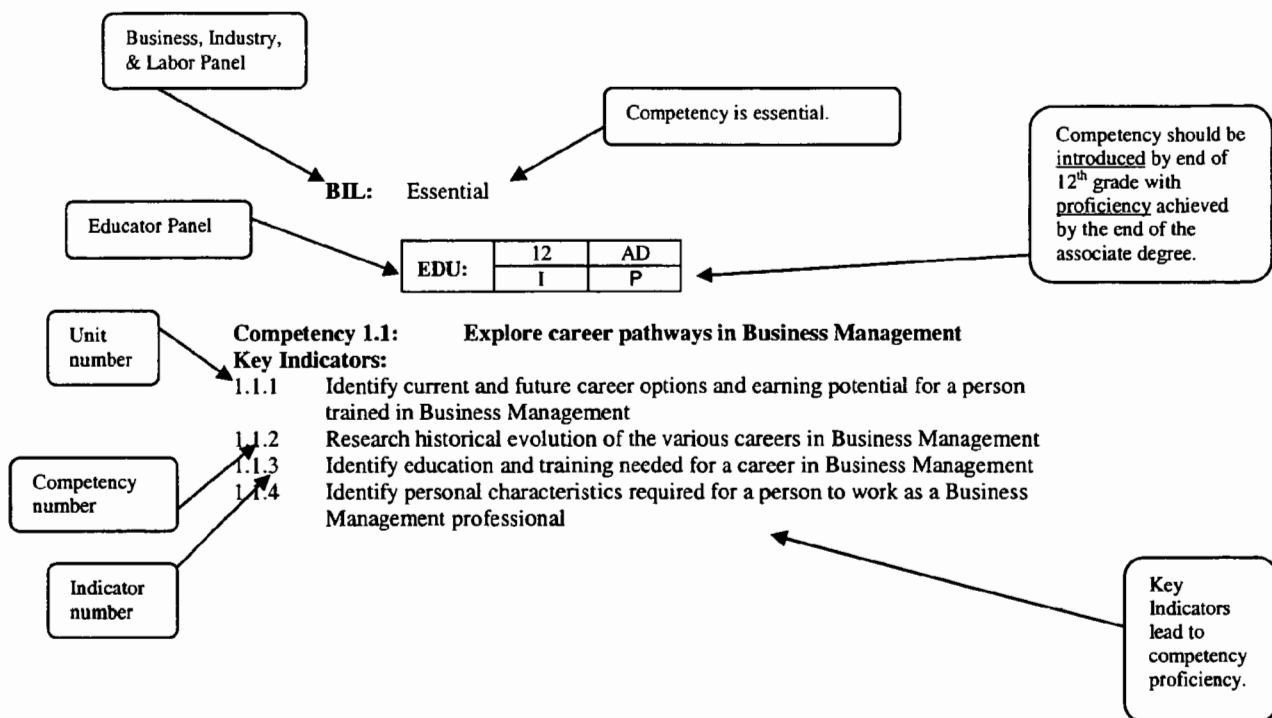

**R = Reinforced** (Competencies marked proficient at the secondary level are to be reinforced at the associate degree level.)

**Grade Level:** 12 = by the end of grade 12  
AD = by the end of the Associate Degree

## ACADEMIC CONNECTION

All College Tech Prep programs are responsible for meeting the academic content standards.
